determining the future of ambient technologies

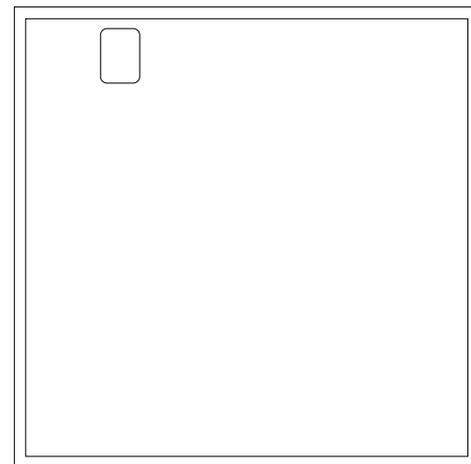

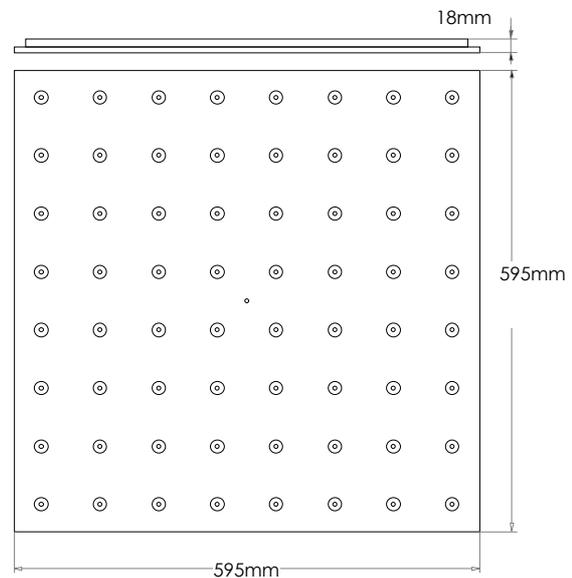

Ambianti Lighting Tile 5K/30s
Specification Sheet

ambianti

Technical specifications ¹	
Power consumption (max)	19W
Input voltage (DC)	32V
Current (max)	0.6A
Operating temperature	0 to 40 Celsius
Storage temperature	-20 to 80 Celsius
Weight ²	4.5Kg
Width	595mm
Length	595mm
Height	18mm
Package dimensions	610 x 610 x 30mm

Optical characteristics	
Luminous intensity per LED	30cd (5400cd/m ²)
Chromaticity coordinates	X:0.344 Y:0.355
Color temperature	5000K
Beam angle	30°
Number of LEDs per tile	64
Brightness adjustment	Individually dimmable and controllable LEDs (16 brightness levels). 196 additional levels of brightness per tile.
Refresh rate	250Hz

Accessories	
Backup	Last known good firmware back up back-face extension module ³ .
Wi-Fi	Wi-Fi connectivity back-face extension module ³ .
Bluetooth	Bluetooth connectivity back-face extension module ³ .
Point&play	Infrared point&play remote control.

Description

Ambianti cuttable lighting tiles compose a highly adaptable lighting solution with innovative computing capabilities. Designed to fit standardized suspended ceiling grids, the tiles can be cut and drilled⁴ at the point of installation, attached to a ceiling in any configuration, and connected to each other in one click⁵. Once connected, the tiles communicate autonomously and self-configure, forming a distributed computing system, where each tile knows its position and the position of others. No network infrastructure rewiring or external control unit is required. The tiles can be controlled through a variety of devices, such as a tablet or a point&play remote control.

¹ Subject to change without notice.

² Valid for high density (1000Kg/m³) MDF façade.

³ Full functionality available with one module per ceiling.

⁴ More information available on request.

⁵ Connectors not depicted on the drawing.
